Keep Off the Grass. Better Yet, Lose It.

The front lawn of Foundation Communities' Sierra Ridge Apartments in South Austin was recently transformed into a Fritz Haeg Edible Estate. The concept behind Edible Estates is simple: Take a traditional grass front yard, and transform it into a produce garden. To date, Fritz has carried out six grass-to-garden projects in the United States and abroad and has published a book documenting the transformations—*Edible Estates: Attack on the Front Lawn* (Metropolis Books, \$24.95).
