The Lawn Ranger

• [FRITZ HAEG, ACTIVIST]

Haeg, architect, artist and eco-conscious instigator, is inspired by his reading of architecture's role in the 21st century. "Architecture is highly collaborative and spans the arts and sciences," he says. His recent book *Edible Estates: Attack on the Front Lawn* (\$25; Metropolis Books) is an exuberant manifesto and ingenious advice guide: Think globally, act locally, abolish wasteful lawns, and grow tasty vegetables (FritzHaeg.com). —SM
